Reference: IPL 5711

To appear in: *Information Processing Letters*

Received date: 4 September 2011  
Revised date: 12 June 2018  
Accepted date: 20 June 2018

Please cite this article in press as: Y. Biletskiy et al., Building a business domain meta-ontology for information pre-processing, *Inf. Process. Lett.* (2018), <https://doi.org/10.1016/j.ipl.2018.06.009>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## **Highlights**

- The structure of business domain meta-ontology is presented.
- The instance data for the specific business domain meta-ontology can be extracted from the source documents.
- The meta-ontology is customized and implemented with Protégé.
- An example of the meta-ontology population from source documents is presented.
