Curvature based sampling of curves and surfaces

Luca Pagani, Paul J. Scott

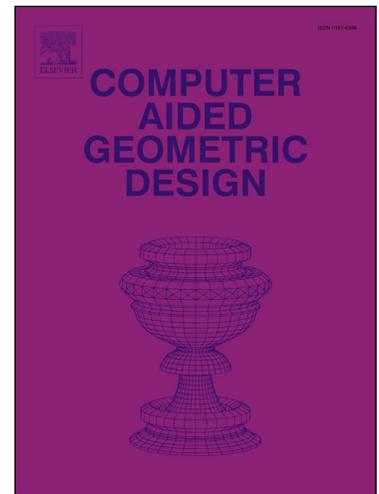

PII: S0167-8396(17)30146-2
DOI: <https://doi.org/10.1016/j.cagd.2017.11.004>
Reference: COMAID 1649

To appear in: *Computer Aided Geometric Design*

Received date: 17 March 2017
Accepted date: 31 August 2017

Please cite this article in press as: Pagani, L., Scott, P.J. Curvature based sampling of curves and surfaces. *Comput. Aided Geom. Des.* (2017), <https://doi.org/10.1016/j.cagd.2017.11.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A sampling of NURBS curves based on the arc length and the curvature is proposed.
- A sampling of NURBS surfaces based on the areal and the mean curvature parametrisation is proposed.
- The sampling of surface generated from two or more curves is investigated.
