Patient Independent Representation of the Detailed Cardiac Ventricular Anatomy

Bruno Paun, Bart Bijnens, Tinen Iles, Paul A. Iaizzo, Constantine Butakoff

PII: S1361-8415(16)30123-2
DOI: [10.1016/j.media.2016.07.006](https://doi.org/10.1016/j.media.2016.07.006)
Reference: MEDIMA 1165

To appear in: *Medical Image Analysis*

Received date: 7 November 2015
Revised date: 5 July 2016
Accepted date: 20 July 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Patient independent anatomical parametrization of the detailed cardiac ventricular anatomy.
- Mapping between different cardiac geometries.
- Parametrization suitable for statistical analysis of the detailed ventricular anatomy.
- Framework for incorporating detailed anatomy into computational models.
