This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Diseases diagnosis systems using fuzzy logic methods are reviewed.
- PRISMA is used for systematic reviews and meta-analyses.
- The results showed the effectiveness of fuzzy methods in diseases diagnosis process.
