This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlight

- Calculation of 10-year stroke prediction probability and classifying the user's individual probability of stroke into five categories
- We uploaded personalized warning and lifestyle correction messages for the each different category to personal health record web page of the National Health Insurance Service.
