This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A new Many-Objective Pareto Local Search algorithm is proposed
- The new algorithm allows solving problems with more than two objectives
- The new algorithm is tested on two different problems with up to 5 objectives
- The experiment shows high effectiveness of the proposed algorithm
