This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A single-site maintenance system with outsourcing is analyzed
- Joint optimization of spare parts inventories and workforce capacity is examined
- A Mixed-Integer Programming (MIP) for exact optimization is formulated
- A time-efficient and accurate optimization heuristic is proposed
- The optimal balance between system costs is analyzed in different settings
