This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We study robustness of the constant discount factor assumption for remanufactured products.
- We use a model of strategic remanufacturing under quality choice.
- We numerically solve the model with a variable discount factor.
- We find consistency between the results under constant and variable discount factors.
