Please cite this article as: Elena Fernández, Mireia Roca-Riu, M. Grazia Speranza, The Shared Customer Collaboration Vehicle Routing Problem, *European Journal of Operational Research* (2017), doi: [10.1016/j.ejor.2017.08.051](https://doi.org/10.1016/j.ejor.2017.08.051)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We introduce the Shared Customer Collaboration Vehicle Routing Problem
- There are potential savings when carriers collaborate to serve shared customers
- Two alternative formulations are proposed and analyzed
- Extensive computational experiments are provided
- We quantify the potential benefits compared to the case when no collaboration exists
