This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We study the cross-training that a work team needs in order to cope with demand mix variation.
- Demand mix variation is defined in a straightforward, business sense manner.
- A certain level of absences is also considered.
- To numerically solve the problem a constraint-based selection procedure is developed.
