This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1. Numerous online reviews of hotels are described by linguistic distribution assessments that can retain original information effectively.
2. New comparison method is defined based on linguistic scale functions to break through the restriction of previous comparison method for linguistic distribution assessments.
3. New distance measurement between linguistic distribution assessments is defined based on the linguistic scale functions to calculate the distance between any two linguistic distribution assessments that have different numbers of linguistic terms.
4. In order to deal with the conflicting criteria and the preferences for criteria in different groups, a mathematical model is designed based on an extended VIKOR approach and the idea of PA operator to select hotels on tourism websites.
5. A case study of TripAdvisor.com is conducted to select suitable hotels using online reviews of these hotels
