Forward modeling of gravity anomalies based on cell merge and parallel computing

Tao Chen, Guibin Zhang

PII: S0098-3004(17)31270-0

DOI: [10.1016/j.cageo.2018.07.007](https://doi.org/10.1016/j.cageo.2018.07.007)

Reference: CAGEO 4159

To appear in: *Computers and Geosciences*

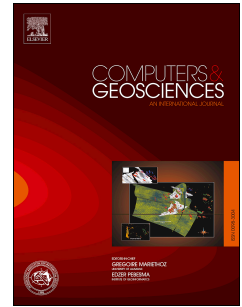

Received Date: 10 December 2017

Revised Date: 13 July 2018

Accepted Date: 20 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Forward Modeling of Gravity Anomalies Based on Cell**

2 **Mergence and Parallel Computing**

15 Zhang).

¹Tao Chen wrote the code, designed and performed the model tests, analyzed the results of the model tests, prepared figures, wrote the paper, reviewed drafts of the paper.
Guibin Zhang proposed the idea, conceived and designed the model tests, and reviewed drafts of the paper.
