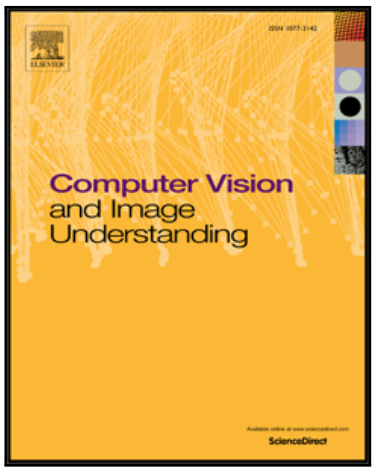
Accepted Manuscript



Active Learning for Designing Detectors for Infrequently Occurring Objects in Wide-Area Satellite Imagery

Tanmay Prakash, Avinash C. Kak

PII: S1077-3142(18)30039-0
DOI: 10.1016/j.cviu.2018.03.004
Reference: YCVIU 2677

To appear in: *Computer Vision and Image Understanding*

Received date: 24 June 2017
Revised date: 28 February 2018
Accepted date: 15 March 2018

Please cite this article as: Tanmay Prakash, Avinash C. Kak, Active Learning for Designing Detectors for Infrequently Occurring Objects in Wide-Area Satellite Imagery, *Computer Vision and Image Understanding* (2018), doi: 10.1016/j.cviu.2018.03.004

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Object detection in wide areas of satellite imagery
- Active learning for efficient generation of ground truth
- Distributed cloud computing for reduced human-computer interaction latencies
- Demonstrated for detection of pedestrian crosswalks and transmission towers
