This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We explore the effects of sample types on the predictive performance of ensembles
- We focus on credit risk and corporate bankruptcy prediction problems
- We characterize the databases based on the positive sample types
- We show that performance depends on the prevalent type of positive samples
