

## Accepted Manuscript

A Database of Unconstrained Vietnamese Online Handwriting and Recognition Experiments by Recurrent Neural Networks

Hung Tuan NGUYEN , Cuong Tuan NGUYEN , Pham The BAO , Masaki NAKAGAWA

PII: S0031-3203(18)30014-1  
DOI: [10.1016/j.patcog.2018.01.013](https://doi.org/10.1016/j.patcog.2018.01.013)  
Reference: PR 6422

To appear in: *Pattern Recognition*

Received date: 12 February 2017  
Revised date: 10 January 2018  
Accepted date: 14 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- A Vietnamese Online Handwriting Database is made and analysed.
- Vietnamese online handwritten text poses a challenge due to many delayed strokes.
- Long Short-Term Memory neural networks is effective to process delayed strokes.
