Snatch Theft Detection in Unconstrained Surveillance Videos Using
Action Attribute Modelling

Debaditya Roy, C. Krishna Mohan

PII: S0167-8655(18)30078-3
DOI: [10.1016/j.patrec.2018.03.004](https://doi.org/10.1016/j.patrec.2018.03.004)
Reference: PATREC 7099

To appear in: *Pattern Recognition Letters*

Received date: 24 October 2017
Revised date: 26 February 2018
Accepted date: 5 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Learning representation for snatch thefts using action attribute modeling.
- Leveraging existing action datasets to train a universal attribute model.
- No labeled snatch theft examples required for training.
