This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A completely new solution for fraud scoring in card payments validated by one of the biggest bank in the world
- Experiments were performed with real dataset with more than 900 millions of credit card operations
- Experiments performance is comparable to state of the art solutions but without any human intervention
