This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A weighting scheme is proposed for a classifier based on Fuzzy Confusion Matrix.
- The Fuzzy Confusion Matrix has been applied to the label-pairwise classification.
- The weighting scheme improves the classification quality.
- The weighting scheme offers an improvement for rare-labels.
- The weighting scheme reduces the bias towards majority labels.
