

## Accepted Manuscript

Title: Direct-acting DNA ethylating agents associated with tobacco use primarily originate from the tobacco itself, not combustion

Authors: Chiung-Wen Hu, Marcus S. Cooke, Yuan-Jhe Chang, Mu-Rong Chao

PII: S0304-3894(18)30521-1  
DOI: <https://doi.org/10.1016/j.jhazmat.2018.07.011>  
Reference: HAZMAT 19519

To appear in: *Journal of Hazardous Materials*

Received date: 7-4-2018  
Revised date: 27-6-2018  
Accepted date: 2-7-2018

Please cite this article as: Hu C-Wen, Cooke MS, Chang Y-Jhe, Chao M-Rong, Direct-acting DNA ethylating agents associated with tobacco use primarily originate from the tobacco itself, not combustion, *Journal of Hazardous Materials* (2018), <https://doi.org/10.1016/j.jhazmat.2018.07.011>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Direct-acting DNA ethylating agents associated with tobacco use primarily originate from the tobacco itself, not combustion
