Thermodynamic modeling of the essential physicochemical interactions between the pore solution and the cement hydrates in chloride-contaminated cement-based materials

Bingbing Guo, Yi Hong, Guofu Qiao, Jinping Ou, Zuohua Li

PII: S0021-9797(18)30761-6
DOI: <https://doi.org/10.1016/j.jcis.2018.07.005>
Reference: YJCIS 23796

To appear in: *Journal of Colloid and Interface Science*

Received Date: 17 March 2018
Revised Date: 29 June 2018
Accepted Date: 2 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Thermodynamic modeling of the essential physicochemical interactions between the pore solution and the cement hydrates in chloride-contaminated cement-based materials
