Title: Development of a Biogas Production and Purification Process using promoted Gas Hydrate Formation – A Feasibility Study

Authors: Florian Filarsky, Carsten Schmuck, Heyko Juergen Schultz

PII: S0263-8762(18)30183-7
DOI: <https://doi.org/10.1016/j.cherd.2018.04.009>
Reference: CHERD 3126

To appear in:

Received date: 4-10-2017
Revised date: 19-2-2018
Accepted date: 8-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Development of a Biogas Production and Purification Process using promoted Gas Hydrate Formation – A Feasibility Study

Graphical abstract

Highlights

- Feasibility Study combining biogas production and hydrate forced gas separation
- Startup of a biogas production via fermentation of a mixed culture from sewage sludge
- Finding of an optimal promoter system with improved separation efficiency
- Separation efficiency determined to show proof of concept
- Construction of a McCabe-Thiele-diagram to determine necessary stage number
