

Author's Accepted Manuscript

High-performance multiple-layer PIM composite hollow fiber membranes for gas separation

Can Zeng Liang, Jiang Tao Liu, Juin-Yih Lai, Tai-Shung Chung

PII: S0376-7388(17)33611-6
DOI: <https://doi.org/10.1016/j.memsci.2018.05.045>
Reference: MEMSCI16185

To appear in: *Journal of Membrane Science*

Received date: 28 December 2017
Revised date: 14 May 2018
Accepted date: 22 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

High-performance multiple-layer PIM composite hollow fiber membranes for gas separation
