Laminar Forced Convection of a Nanofluid in a Microchannel: Effect of Flow Inertia and External Forces on Heat Transfer and Fluid Flow Characteristics

Mahmoud Ahmed, Morteza Eslamian

PII: S1359-4311(14)01198-3

DOI: [10.1016/j.applthermaleng.2014.12.069](https://doi.org/10.1016/j.applthermaleng.2014.12.069)

Reference: ATE 6263

To appear in: *Applied Thermal Engineering*

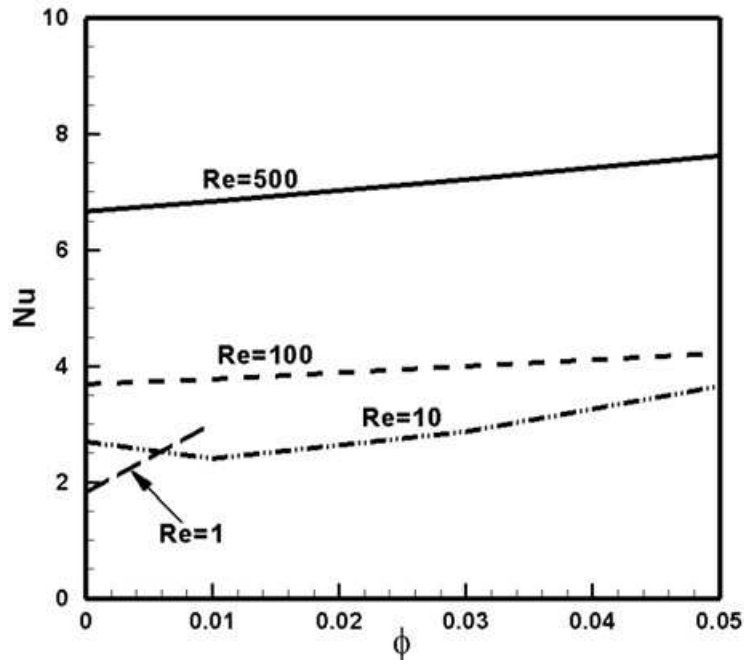

Received Date: 14 July 2014

Revised Date: 28 November 2014

Accepted Date: 29 December 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
