Effect of total solids content on biohydrogen production and lactic acid accumulation during dark fermentation of organic waste biomass

Anish Ghimire, Eric Trably, Luigi Frunzo, Francesco Pirozzi, Piet N.L. Lens, Giovanni Esposito, Elisabeth A. Cazier, Renaud Escudié

PII: S0960-8524(17)31158-6
DOI: <http://dx.doi.org/10.1016/j.biortech.2017.07.062>
Reference: BITE 18482

To appear in: *Bioresource Technology*

Received Date: 25 April 2017
Revised Date: 11 July 2017
Accepted Date: 12 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Effect of total solids content on biohydrogen production and lactic acid accumulation
during dark fermentation of organic waste biomass**
