

## Accepted Manuscript

Title: Ion beam assisted fortification of photoconduction and photosensitivity

Authors: Pragati Kumar, Nupur Saxena, F. Singh, Vinay Gupta

PII: S0924-4247(18)30430-8  
DOI: <https://doi.org/10.1016/j.sna.2018.06.037>  
Reference: SNA 10842

To appear in: *Sensors and Actuators A*

Received date: 12-3-2018  
Revised date: 4-6-2018  
Accepted date: 18-6-2018

Please cite this article as: Kumar P, Saxena N, Singh F, Gupta V, Ion beam assisted fortification of photoconduction and photosensitivity, *Sensors and Actuators: A. Physical* (2018), <https://doi.org/10.1016/j.sna.2018.06.037>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- The applicability of swift heavy ion irradiation is extended for fortification of photoconductivity, photosensitivity with high specific detectivity for visible (405 nm and 470 nm) photosensor along with UV (355 nm)-sensor.
- Sensors presented here were fabricated without requirement of rigorous synthesis procedures.
