Title: A comparative study on electrical properties of dye-sensitized solar cell and silicon photodiode under colored light for optical sensor applications

Authors: Wei Wang, Huihui Yuan, Yumei Zhang, Junjie Xie, Di Xu, Xinyu Chen, Yunlong He, Tao Zhang, Zongqi Chen, Huijiang Shen

PII: S0924-4247(17)32249-5
DOI: <https://doi.org/10.1016/j.sna.2018.04.013>
Reference: SNA 10726

To appear in: *Sensors and Actuators A*

Received date: 15-12-2017
Revised date: 22-3-2018
Accepted date: 9-4-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A comparative study on electrical properties of dye-sensitized solar cell and silicon photodiode under colored light for optical sensor applications

Highlights

- A RGB LED is used as light source rather than a solar light simulator.
