Title: Excitation dependent emission combined with different quenching manners supports carbon dots to achieve multi-mode sensing

Authors: Chun Li, Weijian Liu, Xiaobo Sun, Wei Pan, Guifeng Yu, Jinping Wang

PII: S0925-4005(18)30320-4
DOI: <https://doi.org/10.1016/j.snb.2018.02.050>
Reference: SNB 24145

To appear in: *Sensors and Actuators B*

Received date: 4-10-2017
Revised date: 5-2-2018
Accepted date: 6-2-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

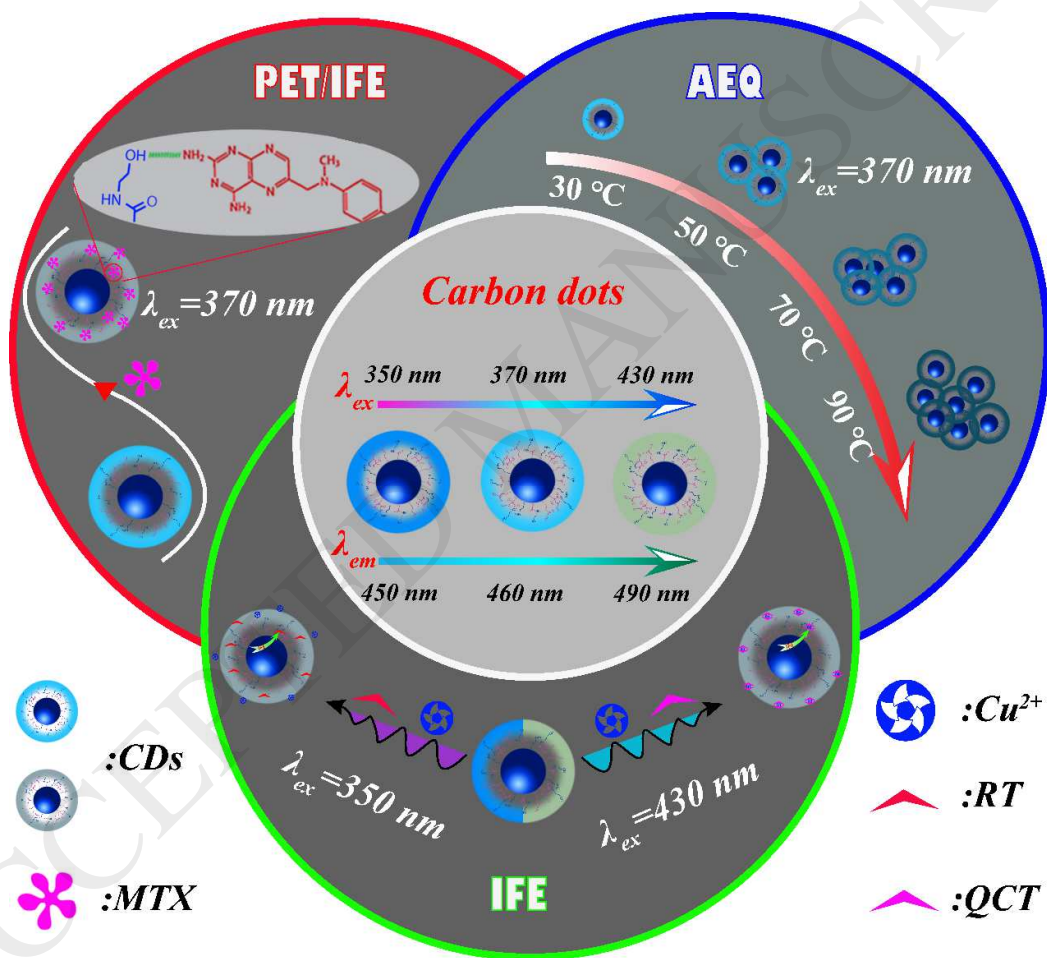

Excitation dependent emission combined with different quenching manners supports carbon dots to achieve multi-mode sensing

Graphical Abstract

Highlights

- Multi-mode sensing for methotrexate, rutin, quercetin and temperature were achieved
- Excitation dependent emission combined with different quenching manners
