A semi-analytical modelling of cutting using crystal plasticity theory and flow line approach

K.S. Djaka , A. Moufki , M. Nouari , P. Laheurte , A. Tidu

PII: S0020-7403(18)31339-0
DOI: [10.1016/j.ijmecsci.2018.07.034](https://doi.org/10.1016/j.ijmecsci.2018.07.034)
Reference: MS 4446

To appear in: *International Journal of Mechanical Sciences*

Received date: 25 April 2018
Revised date: 10 July 2018
Accepted date: 24 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A semi-analytical model for orthogonal cutting of polycrystalline materials.
- A thermomechanical crystal plasticity model was combined with a flow line approach.
- Influence of the microstructure evolution on the chip formation.
