Dynamic Availability Assessment of Safety Critical Systems Using a Dynamic Bayesian Network

Md. Tanjin Amin , Faisal Khan , Syed Imtiaz

PII: S0951-8320(17)31477-1
DOI: [10.1016/j.ress.2018.05.017](https://doi.org/10.1016/j.ress.2018.05.017)
Reference: RESS 6168

To appear in: *Reliability Engineering and System Safety*

Received date: 19 December 2017
Revised date: 4 April 2018
Accepted date: 31 May 2018

Please cite this article as: Md. Tanjin Amin , Faisal Khan , Syed Imtiaz , Dynamic Availability Assessment of Safety Critical Systems Using a Dynamic Bayesian Network, *Reliability Engineering and System Safety* (2018), doi: [10.1016/j.ress.2018.05.017](https://doi.org/10.1016/j.ress.2018.05.017)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A new Hybrid methodology for fault detection and diagnosis
- Methodology is efficient and effective in detecting and locating fault
- Testing and validation of the methodology using two case studies
- Recommendation to improve process system performance using the hybrid technique
