

Author's Accepted Manuscript

A method for investigating the cellular response to cyclic tension or compression in three-dimensional culture

Babak Sarrafpour, Philip Boughton, Ramin M. Farahani, Stephen C Cox, Gareth Denyer, Elizabeth Kelly, Hans Zoellner

PII: S1751-6161(18)30521-6
DOI: <https://doi.org/10.1016/j.jmbbm.2018.08.006>
Reference: JMBBM2917

To appear in: *Journal of the Mechanical Behavior of Biomedical Materials*

Received date: 19 January 2018
Revised date: 17 May 2018
Accepted date: 7 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A method for investigating the cellular response to cyclic tension or compression in three-dimensional culture
