Short communication

A noninvasive surface wave technique for measuring finger's skin stiffness

Xiaoming Zhang

PII: S0021-9290(17)30713-3

DOI: <https://doi.org/10.1016/j.jbiomech.2017.12.008>

Reference: BM 8494

To appear in: *Journal of Biomechanics*

Accepted Date: 10 December 2017

Please cite this article as: X. Zhang, A noninvasive surface wave technique for measuring finger's skin stiffness, *Journal of Biomechanics* (2017), doi: <https://doi.org/10.1016/j.jbiomech.2017.12.008>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Short Communication****A noninvasive surface wave technique for measuring finger's skin stiffness**
