This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Result of a highly controlled field experiment in Morocco on the norms of charitable giving in Islam
- Make use of language as a prime to induce religious norms
- Subject give less to a charity when their donations are made public, which is in contrast to what has been found in similar contexts
- This result is driven by religious norms
