Title: Brain plasticity and sleep: implication for movement disorders

Authors: Serena Caverzasio, Ninfa Amato, Mauro Manconi, Chiara Prosperetti, Alain Kaelin-Lang, William Duncan Hutchison, Salvatore Galati

PII: S0149-7634(17)30510-9
DOI: <https://doi.org/10.1016/j.neubiorev.2017.12.009>
Reference: NBR 3022

To appear in:

Received date: 17-7-2017
Revised date: 15-12-2017
Accepted date: 18-12-2017

Highlights

- Chapter 1 and 2: Focus on the complex interplay between brain plasticity and sleep.
- Chapters 3: Focus on the complex interplay between brain plasticity and movement disorders such as Parkinson's disease and dystonia.
- Chapter 4: The relation between sleep disturbances and movement disorders: causative or epiphenomenon?
