This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Capital beats coal: how collecting the climate rent increases aggregate investment

Jan Siegmeier *; Linus Mattauch †; Ottmar Edenhofer ‡

October 30, 2017

Suggested running title:

“How collecting the climate rent increases investment”

Acknowledgements We thank Cameron Hepburn, Matthias Kalkuhl and Anselm Schultes for insightful discussions. Financial support from the Michael-Otto-Stiftung for the Chair Economics of Climate Change at TU Berlin is gratefully acknowledged. Linus Mattauch thanks the German National Academic Foundation for financial support. His research was also supported by a postdoctoral fellowship of the German Academic Exchange Service (DAAD).
