

## Accepted Manuscript

Finite-time hybrid projective synchronization of the drive-response complex networks with distributed-delay via adaptive intermittent control

Lin Cheng, Yongqing Yang, Li Li, Xin Sui

PII: S0378-4371(18)30203-6  
DOI: <https://doi.org/10.1016/j.physa.2018.02.124>  
Reference: PHYSA 19244

To appear in: *Physica A*

Received date : 19 October 2017  
Revised date : 23 January 2018

Please cite this article as: L. Cheng, Y. Yang, L. Li, X. Sui, Finite-time hybrid projective synchronization of the drive-response complex networks with distributed-delay via adaptive intermittent control, *Physica A* (2018), <https://doi.org/10.1016/j.physa.2018.02.124>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

This paper has three highlights as follows:

1. This paper investigates the synchronization of drive-response complex networks, the projective synchronization can be extended to hybrid projective synchronization in finite time.
2. In this paper, we discuss general transmission delays and distributed delays are also considered.
3. By find a value for scalar  $\varepsilon$ , it is easier for us to use the LMI toolbox in Theorem 1 .
