This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- We analyze emission taxes in imperfect market with private/public information
- We investigate how information disclosure can improve the tax setting process
- Disclosure improves the ability of the regulator to levy firm-specific taxes
- Disclosure may undermine environmental policy by facilitating collusive behavior
