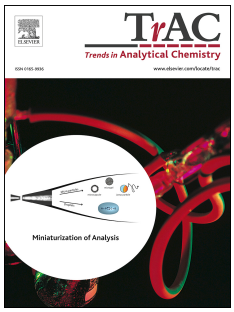
Accepted Manuscript



A State-of-art review on the agility of quantitative proteomics in tuberculosis research

Manikandan Muthu, Anbarasu Deenadayalan, D. Ramachandran, Diby Paul, Judy Gopal, Sechul Chun

PII: S0165-9936(17)30434-X

DOI: 10.1016/j.trac.2018.02.004

Reference: TRAC 15099

To appear in: *Trends in Analytical Chemistry*

Received Date: 28 October 2017

Revised Date: 7 February 2018

Accepted Date: 9 February 2018

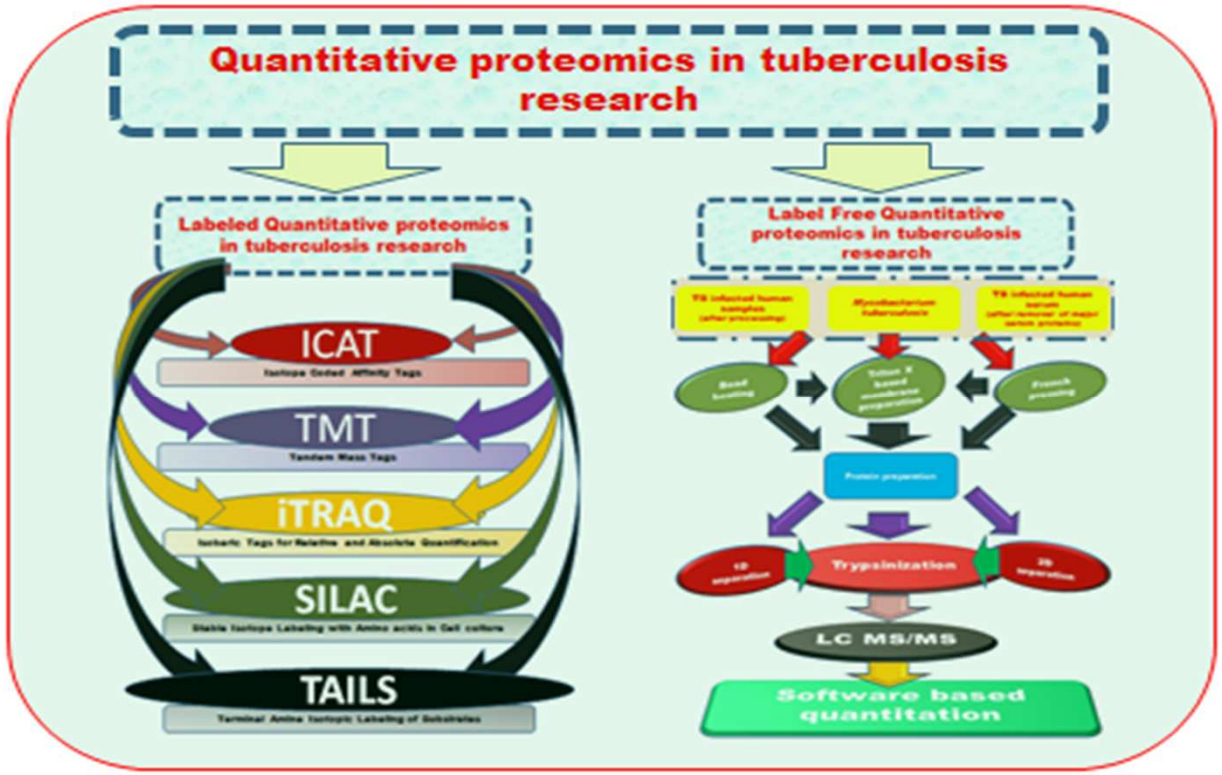
This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.



Quantitative proteomics in tuberculosis research
Labeled Quantitative proteomics in tuberculosis research
ICAT
Isotope Coded Affinity Tags
TMT
Tandem Mass Tags
iTRAQ
Isobaric Tags for Relative and Absolute Quantification
SILAC
Stable Isotope Labeling with Amino acids in Cell culture
TAILS
Terminal Amine Isotopic Labeling of Substrates
Label Free Quantitative proteomics in tuberculosis research
Trypsinization
LC MS/MS
Software based quantitation
