Title: The role played by the molecular weight and acetylation degree in modulating the stiffness and elasticity of chitosan gels

Authors: Pasquale Sacco, Michela Cok, Fioretta Asaro, Sergio Paoletti, Ivan Donati

PII: S0144-8617(18)30602-7
DOI: <https://doi.org/10.1016/j.carbpol.2018.05.060>
Reference: CARP 13642

To appear in:

Received date: 26-2-2018
Revised date: 17-5-2018
Accepted date: 18-5-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The role played by the molecular weight and acetylation degree in modulating the stiffness and elasticity of chitosan gels

Pasquale Sacco^{1,*}, Michela Cok¹, Fioretta Asaro², Sergio Paoletti¹, and Ivan Donati¹
