Title: Development and characterization of chitosan/hyaluronan film for transdermal delivery of thiocolchicoside

Author: Federica Bigucci Angela Abruzzo Bruno Saladini
Maria Caterina Gallucci Teresa Cerchiara Barbara Luppi

PII: S0144-8617(15)00393-8
DOI: <http://dx.doi.org/doi:10.1016/j.carbpol.2015.04.067>
Reference: CARP 9898

To appear in:

Received date: 9-12-2014
Revised date: 22-4-2015
Accepted date: 25-4-2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Highlights:**

- 2 • films based on different weight ratios of chitosan and hyaluronate were prepared;
- 3 • water-uptake ability changed in relation to polymeric composition of film;
- 4 • the lower the drug diffusion through the film, the lower the permeation through the skin.
