

Carbohydrate Research Vol. 380, 2013

Contents

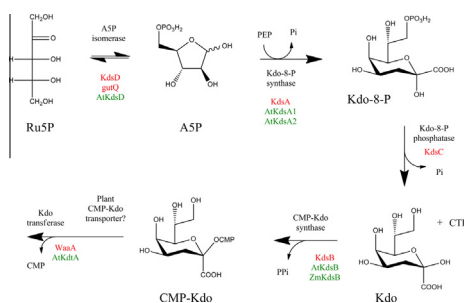

REVIEWS

Biochemistry and Enzymes

Conservation of the 2-keto-3-deoxymanno-octulosonic acid (Kdo) biosynthesis pathway between plants and bacteria

pp 70–75

Kevin M. Smyth*, Alan Marchant

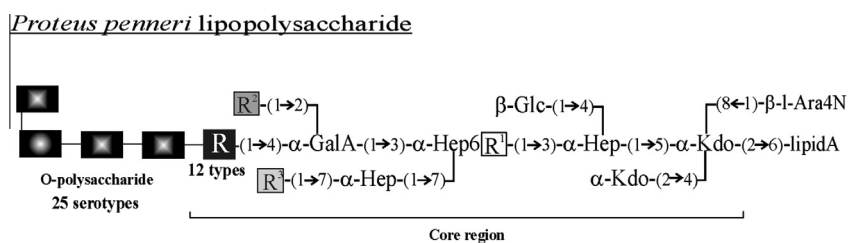

Polysaccharides

Immunochemical properties of *Proteus penneri* lipopolysaccharides—one of the major *Proteus* sp. virulence factors

pp 16–22

Agata Palusiak*

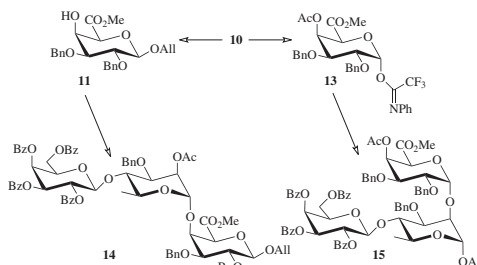

FULL PAPERS

Synthesis

Efficient synthesis of building blocks for branched rhamnogalacturonan I fragments

pp 9–15

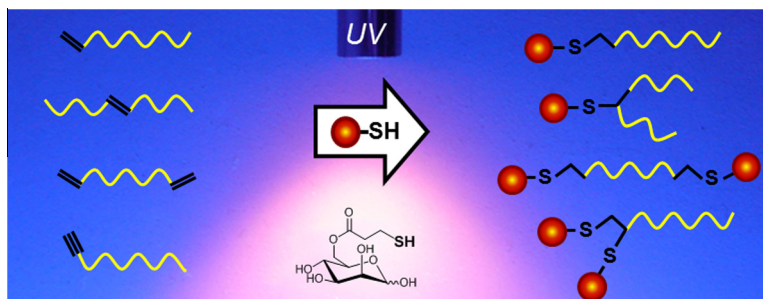

Amayak Pogosyan, Andreas Gottwald, Dirk Michalik, Hans-Ulrich Endress, Christian Vogel*

Monocatenary, branched, double-headed, and bolaform surface active carbohydrate esters via photochemical thiol-ene/-yne reactions

pp 29–36

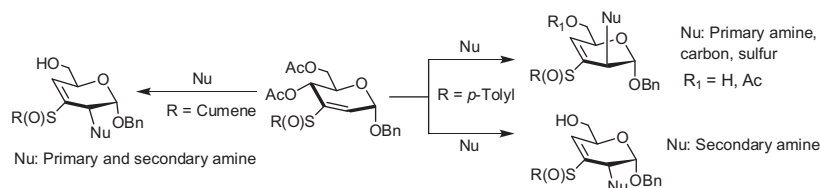

Cédric Boyère, Guy Broze, Christophe Blecker, Christine Jérôme, Antoine Debuigne*

Facial selectivities in the nucleophilic additions of 2,3-unsaturated 3-arylsulfinyl pyranosides

pp 51–58

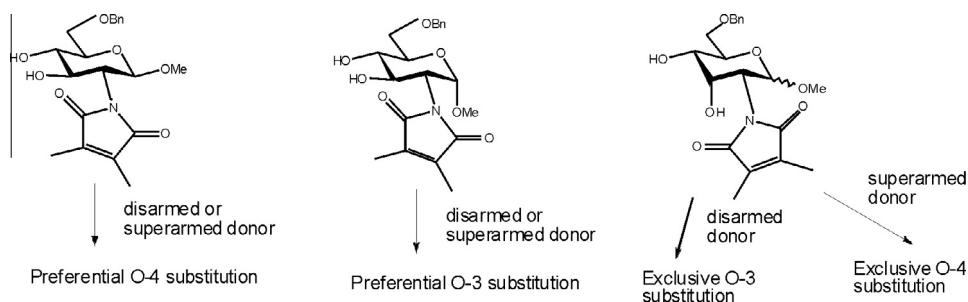

Arunima Mukherjee, Narayanaswamy Jayaraman*

Differential O-3/O-4 selectivity in the glycosylation of *N*-dimethylmaleoyl-protected hexamine acceptors: effect of a conformationally armed (superarmed) glycosyl donor

pp 167–173

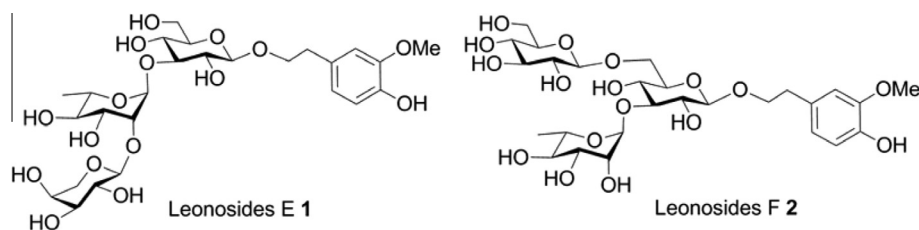

F. Della Felice, Edmundo A. Rúveda, Carlos A. Stortz, María I. Colombo*

Synthesis of Leonosides E and F derived from *Leonurus japonicus* Houtt

pp 174–180

Guofeng Gu*, Yisheng Zhao, Zhongwu Guo*
