Machine learning prioritizes synthesis of primaquine ureidoamides with high antimalarial activity and attenuated cytotoxicity

Jurica Levatić, Kristina Pavić, Ivana Perković, Lidija Uzelac, Katja Ester, Marijeta Kralj, Marcel Kaiser, Matthias Rottmann, Fran Supek, Branka Zorc

PII: S0223-5234(18)30075-8

DOI: [10.1016/j.ejmech.2018.01.062](https://doi.org/10.1016/j.ejmech.2018.01.062)

Reference: EJMECH 10139

To appear in: *European Journal of Medicinal Chemistry*

Received Date: 16 November 2017

Revised Date: 16 January 2018

Accepted Date: 18 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
