Application of the small-angle X-ray scattering technique for structural analysis studies: A review

Jingpeng Li, Aiquan Jiao, Shuo Chen, Zhengzong Wu, Enbo Xu, Zhengyu Jin

PII: S0022-2860(17)31651-4
DOI: 10.1016/j.molstruc.2017.12.031
Reference: MOLSTR 24650
To appear in: *Journal of Molecular Structure*
Received Date: 31 August 2017
Revised Date: 20 November 2017
Accepted Date: 11 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- (1) A brief introduction of the SAXS were presented.
- (2) The main focus was placed on the application of SAXS for structural analysis studies.
- (3) The simultaneous performance of SAXS with other instruments was addressed.
- (4) The differences between SAXS and other techniques were discussed.
- (5) The practical points and future perspectives of utilizing SAXS were summarized.
