Change in provenance of branched glycerol dialkyl glycerol tetraethers over the Holocene in the Baltic Sea and its impact on continental climate reconstruction

Lisa Warden, Matthias Moros, Yuki Weber, Jaap S. Sinninghe Damsté

PII: S0146-6380(18)30058-5
DOI: <https://doi.org/10.1016/j.orggeochem.2018.03.007>
Reference: OG 3697

To appear in: *Organic Geochemistry*

Received Date: 7 December 2017
Revised Date: 28 February 2018
Accepted Date: 18 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Change in provenance of branched glycerol dialkyl glycerol tetraethers over the Holocene in the Baltic Sea and its impact on continental climate reconstruction
