Reduced physical aging rates of polylactide in polystyrene/polylactide multilayer films from fast scanning calorimetry

Xavier Monnier, Samira Fernandes Nassar, Sandra Domenek, Alain Guinault, Cyrille Sollogoub, Eric Dargent, Nicolas Delpouve

PII: S0032-3861(18)30612-8

DOI: [10.1016/j.polymer.2018.07.017](https://doi.org/10.1016/j.polymer.2018.07.017)

Reference: JPOL 20736

To appear in: *Polymer*

Received Date: 25 January 2018

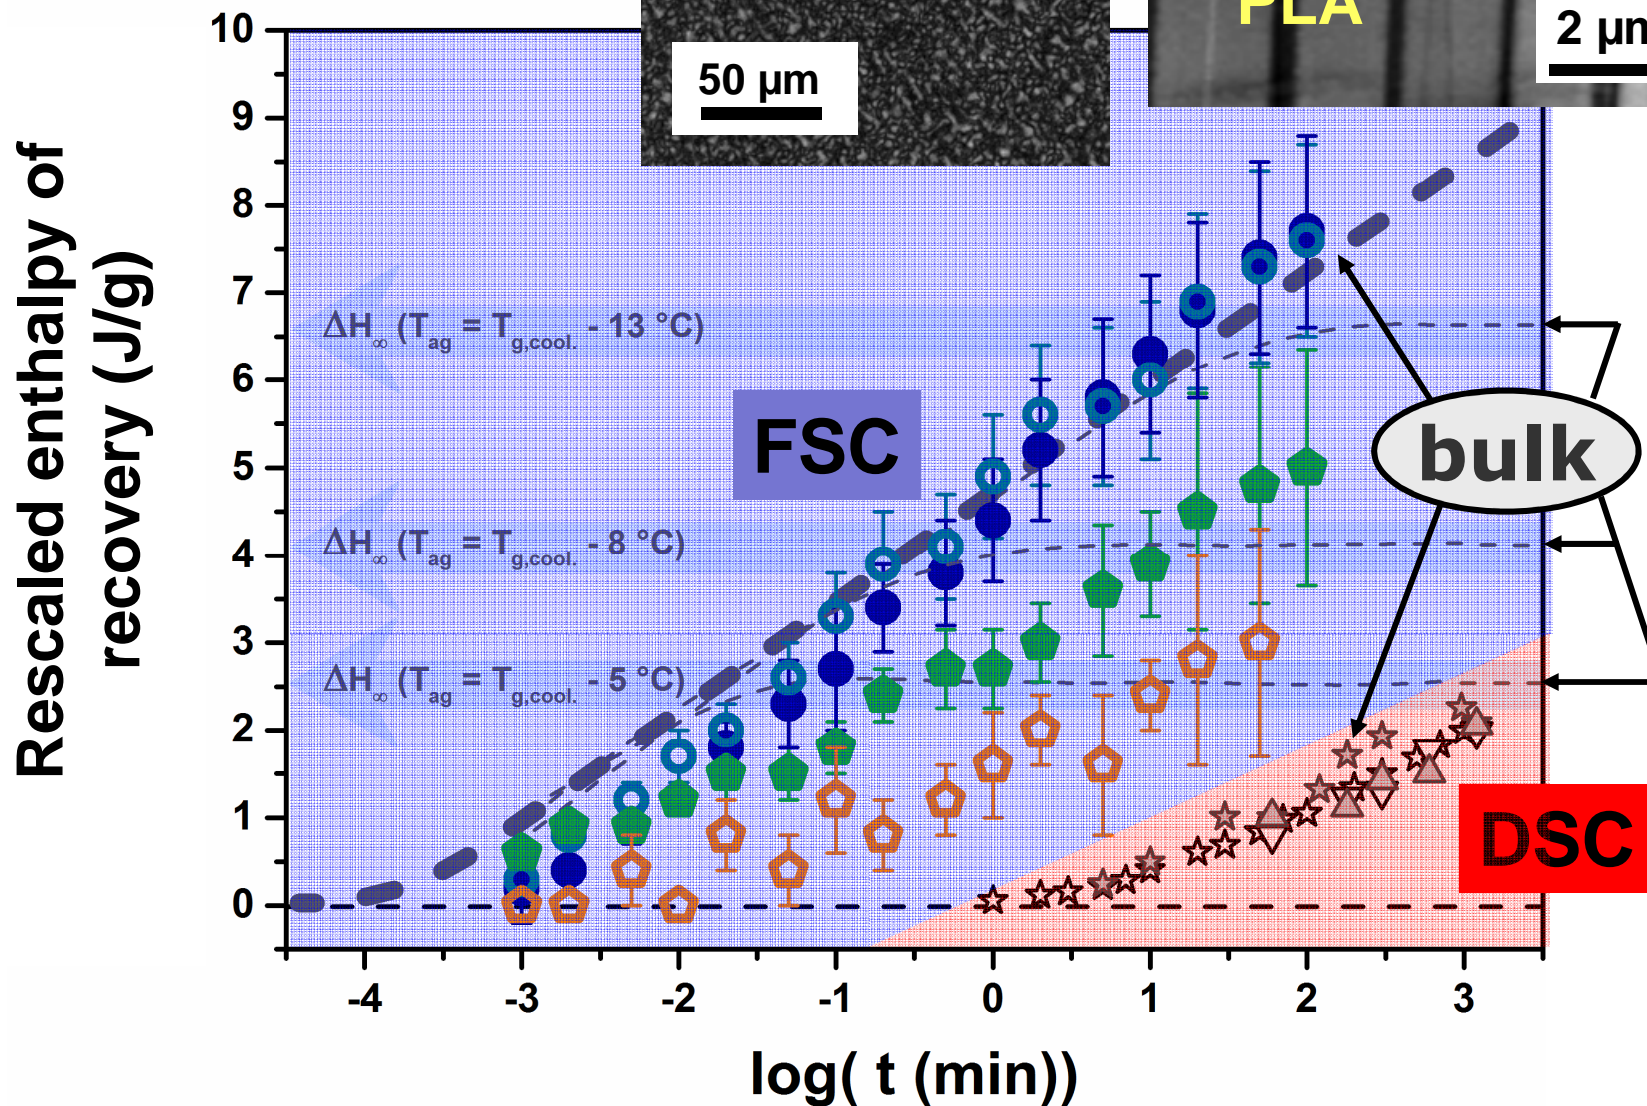

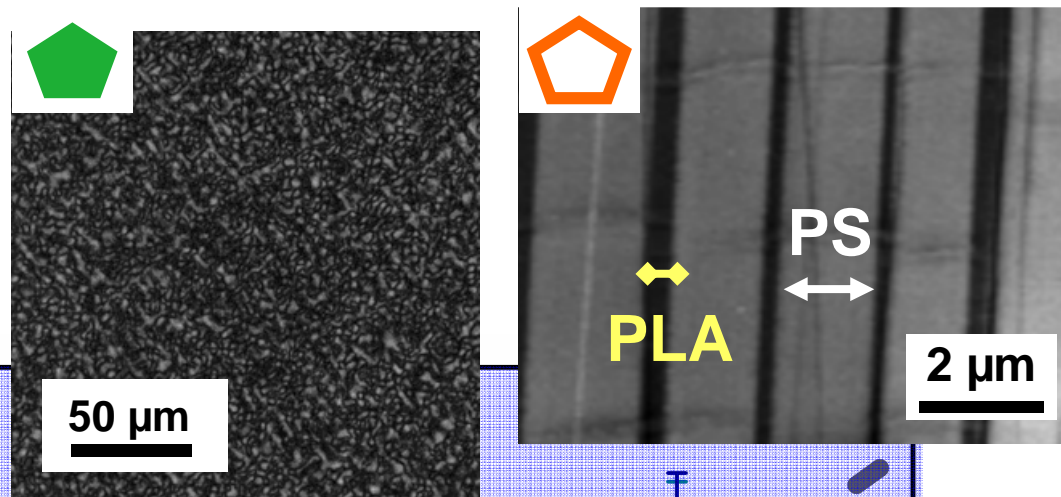

Revised Date: 27 June 2018

Accepted Date: 3 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Using FSC to highlight differences in aging kinetics
