

## Accepted Manuscript

Physicochemical, pharmacokinetic and pharmacodynamic analyses of amphiphilic cyclodextrin-based nanoparticles designed to enhance intestinal delivery of insulin

Elena Presas, Fiona McCartney, Eric Sultan, Corina Hunger, Sabine Nellen, Clara V. Alvarez, Ulrich Werner, Didier Bazile, David J. Brayden, Caitriona M. O'Driscoll

PII: S0168-3659(18)30448-6  
DOI: doi:[10.1016/j.jconrel.2018.07.045](https://doi.org/10.1016/j.jconrel.2018.07.045)  
Reference: COREL 9405

To appear in: *Journal of Controlled Release*

Received date: 23 March 2018  
Revised date: 11 July 2018  
Accepted date: 29 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
