Graphical Abstract

Fabrication of highly efficient carbon coated exfoliated tungsten disulfide nanosheets core-shell nanostructure as a promising solar-light driven photocatalyst

Prabhakar Vattikuti^a, S. V. Sanchari Shome^b, Ganesh Koyyada^{c,*}, Jae Hak Jung^{c,*}

☐ Carbon-coated e-WS₂ nanosheets (C@e-WS₂) have been synthesized via liquid-phase ultrasonic exfoliation method and simple hydrothermal process.
