Open Porous Graphene Nanoribbon Hydrogel *via* Additive-Free Interfacial Self-Assembly: Fast Mass Transport Electrodes for High-Performance Biosensing and Energy Storage

Joonwon Lim, Gil Yong Lee, Ho Jin Lee, Seung Keun Cha, Dong Sung Choi, Sung Hwan Koo, Won Jun Lee, Sang Ouk Kim

PII: S2405-8297(18)30284-8
DOI: <https://doi.org/10.1016/j.ensm.2018.06.004>
Reference: ENSM414

To appear in: *Energy Storage Materials*

Received date: 12 March 2018
Revised date: 4 June 2018
Accepted date: 4 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
