Comparison of microstructural and mechanical properties of friction stir spot welded ultra-high strength dual phase and complex phase steels

Hrishikesh Das, Mounarik Mondal, Sung-Tae Hong, Yeongseok Lim, Kwang-Jin Lee

PII: S1044-5803(17)33222-9  
DOI: doi:[10.1016/j.matchar.2018.03.022](https://doi.org/10.1016/j.matchar.2018.03.022)  
Reference: MTL 9111  
To appear in: *Materials Characterization*  
Received date: 16 November 2017  
Revised date: 15 March 2018  
Accepted date: 16 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Comparison of microstructural and mechanical properties of friction stir spot welded ultra-high strength dual phase and complex phase steels**
