Tuning the electronic structure of graphene through alkali metal and halogen atom intercalation

Sohail Ahmad, Pere Miró, Martha Audiffred, Thomas Heine

PII: S0038-1098(18)30002-4

DOI: [10.1016/j.ssc.2018.01.002](https://doi.org/10.1016/j.ssc.2018.01.002)

Reference: SSC 13362

To appear in: *Solid State Communications*

Received Date: 19 December 2017

Accepted Date: 2 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Tuning the electronic structure of graphene through alkali metal and halogen atom intercalation
