Novel scalable synthesis of porous silicon/carbon composite as anode material for superior lithium-ion batteries

Xiaofu Tang, Guangwu Wen, Yan Song

PII: S0925-8388(17)34535-8

DOI: [10.1016/j.jallcom.2017.12.331](https://doi.org/10.1016/j.jallcom.2017.12.331)

Reference: JALCOM 44417

To appear in: *Journal of Alloys and Compounds*

Received Date: 11 October 2017

Revised Date: 24 December 2017

Accepted Date: 27 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
